Education

Sri Eshwar College of Engineering

Coimbatore, TN, India

Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.73 / 10 till 3rd Sem)

2024 – Expected May 2028

Competitive Programming & Achievements

- **ICPC:** Participated and competed in the prestigious International Collegiate Programming Contest (ICPC) at the institutional selection level.
- **LeetCode:** Maximum Rating of **1723** — Solved **300+** algorithmic challenges across **20+** live rated contests.
- **Codeforces:** Maximum Rating of **1201 (Pupil)** — Solved **70+** logic and math implementation tasks.
- **CodeChef:** Maximum Rating of **1408 (2-Star Coder)** — Successfully evaluated **750+** automated test suites across **25+** contests.
- **SkillRack:** Solved **1740+** foundational programming challenges — Ranked **4247** globally on the competitive platform.
- **Recognition:** Awarded **Institute 6th Rank** overall on the LeetCode platform hierarchy.

Internship Experiences

Aptitude Guru Hem

2025

Full-Stack Developer Intern

Remote, India

- Engineered a comprehensive full-stack fitness tracking web application featuring responsive client interfaces using **React.js** and **React Hooks**.
- Constructed a secure backend pipeline leveraging **Node.js**, **Express.js**, and **MongoDB Atlas** to manage user data streams.
- Implemented cryptographically secure user access patterns using **JWT authentication** protocols and **bcrypt encryption** rules.
- Configured continuous integration pipelines and environment variables to orchestrate production builds on the **Render** cloud platform.

Projects

Learning Management System (LMS) | *ReactJS, Express.js, Node.js, MongoDB, Postman, REST API*

- Engineered a scalable decoupled client-server architecture introducing clean abstraction layers for Admin, Instructor, and Student operations.
- Implemented secure token-based user profile authentication and robust stateful session flows leveraging encrypted verification endpoints.
- Optimized backend database interactions by constructing structural MongoDB indices, ensuring ultra-low transactional latency during multi-user record retrievals.

LeetCode Rating Prediction System | *Python, Machine Learning, Linear Regression, NumPy, Pandas, JavaScript*

- Developed a predictive computational model leveraging supervised regression pipelines to forecast individual user performance shifts using past submission vectors.
- Aggregated, sanitized, and performed comprehensive multi-feature engineering steps on vast performance datasets via NumPy and vectorized Pandas transformations.
- Built a real-time reactive user interface to ingest multidimensional data arrays and dynamically serve statistical output estimations synchronously.

Responsive Blog Web Application | *Python, Django Framework, MongoDB, HTML, CSS, JavaScript, REST API*

- Architected a scalable content distribution workflow, enforcing fluid layouts to minimize mobile and web display component layout shifts.
- Integrated an asynchronous backend communication pipeline capable of safely handling overlapping document creation requests simultaneously.
- Conducted edge-case API performance and validation testing using Postman to verify payload formatting and eliminate response bottlenecks.

Technical Skills

Languages: C++, Python, JavaScript, Java, C, SQL

Technologies & Frameworks: HTML5, CSS3, ReactJS, Node.js, Express.js, Django, RESTful APIs

Databases & Tools: MongoDB, MySQL, Git, GitHub, Postman, VS Code, Power BI, Render

Core CS Fundamentals: Data Structures & Algorithms (DSA), DBMS, OOP, Operating Systems
